

OPIOID TREATMENT:

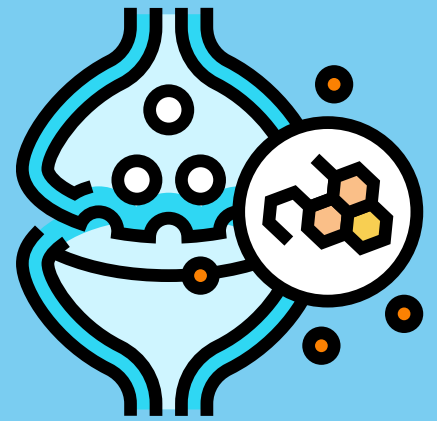

Cutting-Edge Medical Science for Lasting Freedom from Opioid Dependence

UNDERSTANDING OPIOID DEPENDENCE

- Opioids bind to receptors in the brain and body to block pain signals and release dopamine.
- This creates feelings of pain relief and euphoria but can lead to dependency.

Chronic Use Effects:

1. Impaired decision-making.
2. Heightened stress and anxiety.
3. Mood swings and emotional instability.
